### **DETAILED ACTION**

The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.

#### ***Claim Rejections - 35 USC § 103***

Claims 1-4 are rejected under 35 U.S.C. 103(a) as being unpatentable over Carey in view of Khudenko of record for reasons of record.

Claims 5-10 are rejected under 35 U.S.C. 103(a) as being unpatentable over Carey in view of Khudenko as applied to claims above, and further in view of Chorzempa of record for reasons of record.

#### ***Response to Arguments***

Applicant's arguments filed 7/12/10 have been fully considered but they are not persuasive.

Applicant appears to be arguing that the Khudenko patent is non-analogous art.

Applicant states that the Khudenko patent is directed to a method by "spontaneous electrochemical reduction", whereas the present invention uses electrolysis processes.

The section cited in the prior action teaches that the reaction is not spontaneous, indeed the patent states that cementation is "induced by applying high current densities in electrolytic baths" (col. 11, lines 27-32). How is this spontaneous? Further when the patent recites the use of electrolytic baths, such as plating, how is this spontaneous? (col. 11, lines 32-36). The shapes of the electrodes further is said to promote the above induction, includes shapes recited in the Carey patent.

Accordingly, the claims stand rejected.

In any event, while Section 103 requires us to presume full knowledge by the inventor of the prior art in the field of his endeavor (emphasis, expect of "prior," added), but it does not require us to presume full knowledge by the inventor of prior art outside the field of his endeavor, i.e. of "non-analogous" art. In that respect, it only requires us to presume that the inventor would have that ability to select and utilize knowledge from other arts reasonably pertinent to his particular problem which would be expected of a man of ordinary skill in the art to which the subject matter pertains. *In re Antle*, 170 U.S.P.Q. 285.

***Conclusion***

**THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the mailing date of this final action.
